

In the Claims:

Amend claim 1 and cancel claims 10-20, without prejudice, as follows.

The listing of claims will replace all prior versions, and listings of claims in the application:

1. (Currently Amended) A process comprising:
dispersing a first liquid developer concentrate comprising a resin, a colorant, and a liquid developer reconstitution compound, in a carrier liquid, into additional carrier liquid to form a second liquid developer;
depositing the second liquid developer onto a liquid receiver member to form a developer cake;
developing an image with the developer cake;
reclaiming undeveloped developer cake from the cake bearing liquid receiver member; and
redispersing the reclaimed undeveloped developer cake in the second developer liquid and wherein the reclaimed undeveloped cake is kept separated from the second liquid developer until the solids content of the second liquid developer drops below from about 6 to about 10 weight percent.
2. (Cancelled)
3. (Previously presented) A process in accordance with **claim 1**, further comprising wherein the developer cake on the liquid receiver member is charged by a corona charger prior to developing the image.
4. (Original) A process in accordance with **claim 1**, wherein the second liquid developer is dielectric with a conductivity of from about 0.01 to about 5 pS/cm.
5. (Previously presented) A process in accordance with **claim 1**, further comprising continuously measuring the solids content or solids concentration of the second liquid developer in a developer sump.
6. (Cancelled)

7. (Previously presented) A process in accordance with **claim 1**, further comprising transferring the developed image to a receiver substrate.

8. (Cancelled)

9. (Original) A process in accordance with **claim 1**, wherein the reclaimed developer cake is combined directly with the second liquid developer.

Claims 10-20 (Cancelled).
